

LMCE 2018 Program at a Glance

As of October, 2018

Date	Thursday, November 1					Friday, November 2					Saturday, November 3					Date
Room	Walker Hall 1	Walker Hall 2	Cosmos Hall	Art Hall	Vista Hall 1	Walker Hall 1	Walker Hall 2	Cosmos Hall	Art Hall	Vista Hall 1	Walker Hall 1	Walker Hall 2	Cosmos Hall	Art Hall	Room	
08:00	SY 01 (Kor) The current status of healthcare-associated infection (HAI) and the role of clinical microbiology				KS 01 Clinical pathologists and taking care of patients in the clinic	SY 06 Clinical laboratory reimbursement - Financial aspects of laboratory medicine				KS 03 Bioactive lipids in laboratory medicine					08:00	
09:00					SY 05 Statistics & ethics for laboratory researches					SY 07 New molecular technologies for personalized medicine					OP 01 Clinical chemistry 1	SY 14 CLSI-KSLM Session Customer focused documents of CLSI
10:00	SY 02 (Kor) Inspector workshop of the Korean laboratory accreditation program								Senate Meeting						10:00	
11:00	SY 03 (Kor) Education course for laboratory medicine specialist														Pre-congress 01 Patient centered laboratory medicine (Cardiac disease, Women's health, Oncology)	Pre-congress 02 MSACL Clinical mass spectrometry workshop
12:00					PL 02 AACC-KSLM Select Session Expanding the measurable metabolome: How should we mine the lipidome? (Vista Hall 1, B2)					PL 03 The fight against antimicrobial resistance: Are we doing right? (Vista Hall 1, B2)					12:00	
13:00					EW 01 Review on potential biotin interference in immunoassays	EW 02 Atellica solution workflow - Doing more with less	EW 03 cobas pro integrated solutions - Simplicity meets excellence	EW 04 Significance of full panel assays in syndromic diagnosis for infectious diseases	EW 05 Evaluation of new isothermal amplification molecular diagnostic method for the diagnosis of Influenza infection	EW 07 The clinical utility of prostate health index (phi) for prostate cancer detection and prediction of high risk prostate cancer	EW 08 Diagnosis and treatment of latent tuberculosis infection	EW 09 Measurement and clinical application of HbA1c in Japan	EW 10 Clinical implications of syndromic, rapid, sample-to-answer molecular infectious disease testing	EW 11 Illumina's amplicon-based BRCA1/BRCA2 analysis: Faster and more reliable	13:00	
14:00					SY 08 Practical aspects of laboratory management IV; Laboratory Information System (LIS) & Information Communication Technology (ICT)	SY 09 Education track I	SY 10 Genomics of human leukocyte antigen (HLA) in the era of next generation sequencing (NGS)	OP 02 Clinical microbiology	OP 03 General laboratory medicine & Transfusion medicine	KS 04 Integrative analyses of microbiota, immunity & environment can transform (laboratory) medicine					14:00	
15:00		SY 04 (Kor) MFDS-KSLM Session In vitro diagnostics device registration and modification for MFDS								SY 18 ESCMID-KSLM Session Precision medicine in infectious diseases					SY 19 Guidelines on clinical tests for patient care	SY 20 Role of specialist in transfusion medicine
16:00					SY 11 Accreditation system for the clinical laboratory	SY 12 Education track II	SY 13 AACC-KSLM Select Session Emerging clinical applications of circulating DNA analysis	OP 04 Diagnostic genetics 1 & Diagnostic hematology	OP 05 Clinical chemistry 2 & Diagnostic immunology	KSLM General Assembly (Vista Hall 1, B2)					16:00	
17:00	Opening Ceremony (Walkerhill Theatre, B1)					KS 02 Strategies to optimize medical laboratory for patient care in the era of universal coverage	EW 06 Next molecular diagnostics solution in Sysmex									17:00
18:00	PL 01 Blood type and personality – Asian mythology (Walkerhill Theatre, B1)															18:00
19:00	Welcome Reception (Vista Hall 1, B2)					Banquet (Walkerhill Theatre, B1)										19:00
20:00																20:00
